Project History

Regulatory Analysis & Permitting

Project Name

Review of NJPDES Discharge to Surface Water Application for RCRA Part B Facility

Client

E.I. DuPont DeNemours & Company, Inc.

Services Provided

- # Review of NJPDES Application for Completeness and Deficiencies
- # Review of Data Summary
- # Review of Discharge Monitoring Reports

Project Description

The DuPont company operates a RCRA Part B designated hazardous waste facility in Deepwater, New Jersey, the largest hazardous waste processing facility in the State. DuPont retained SAI to review an application for a NJPDES-Discharge to Surface Water permit for eight outfalls.

Approach

SAI reviewed the data summary prepared by the client and the Discharge Monitoring Reports from the facility to ensure the completeness and accuracy of the application. SAI also advised the client on application strategies.
